

Our Capability...Manufacturing, Engineering & Service Excellence

Did you know that in 2020, Peterson Manufacturing celebrates its 75th anniversary supplying the vehicle safety lighting market?

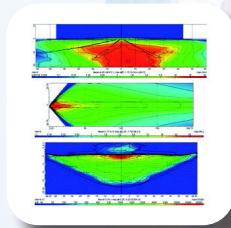

More than just supplying the market, Peterson offers a world class service in:

Design

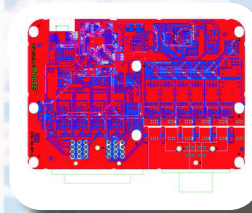

Intelligent engineering providing innovative and high-value LED lighting solutions

Optics

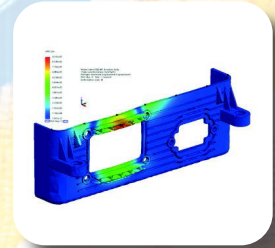

Optical design and evaluation

Electronics

PCB, circuit, hardware and firmware development

Verification

Photometry, metrology, environmental and mechanical

From initial concept to finished product, Peterson provides an outstanding level of expertise, available to ALL customers.

Based in Kansas City, USA, Peterson now operates a 670,00 sq. ft. facility staffed and equipped for cutting-edge manufacturing. The vertically integrated operation includes engineering and design, photometric and environmental testing, tool and die production, harness and wire manufacturing, plastic injection molding, final assembly, warehousing, sales and customer service.

All of this is available to YOU through **PETERSON EUROPE**.

We are a solution led company, so why not speak to us about your needs?

Competitive advantages:

- Custom engineering solutions
- In-house manufacturing expertise
- Rapid time to market

- Privately-owned safety lighting manufacturer, established in 1945
- Headquartered in a modern 670,000 square feet facility
- 400 employees

- Vertically integrated organisation
- Tooling design/manufacture
 - Injection moulding
 - PCB design/manufacture
 - Wiring & harness design and manufacture
 - Final assembly
